We worked hard and long with architects, engineers, psychologists and pedagogues. That's how we found the key to the exciting world of GREEN CITY. We have got just the right insight, as you will see on the next pages, and we know very well what makes GREEN CITY a special place: It is living. Not staying. By the introduction of Green City with superb architectural design, attention to detail and high quality finishes, we have the vision to make this an iconic development which will stand out. Thereby, this project has the potential to become a benchmark in the development of Ajman. Green City is a revolution within the industry and certainly a vision beyond Dubai. The developer has the capability and vision to reflect this concept in the future projects. This has already been demonstrated in our neighboring project, Al-Ittihad Village, where we have also had the privilege to benefit from the expertise of some of the best known names in the property development.
